

FOR IMMEDIATE RELEASE

Confiance IP Solutions, Inc. Achieves Cisco Managed Services Master and Cisco Powered Designation

Greensboro, NC – 9/21/11 – Confiance IP Solutions, Inc. announced that it has achieved the Cisco “Master - Managed Services Channel Program (MSCP)” certification and the “Cisco Powered” certification for Managed Security Services and Managed Unified Communications.

Best in Class Managed Services Provider

The Cisco Managed Services Master Certification is for Cisco partners who sell and deliver Cisco-based managed services through a premium network operations center (NOC) investment, and offer enhanced management and stewardship practices.

Confiance IP Solutions offers managed service ITIL Foundation processes, practices, and tools for supporting Cisco advanced technologies at all lifecycle phases: prepare, plan, design, implement, operate, and optimize. Offered through Guardian *Enterprise* and Guardian *Essentials*, **Guardian** is the exclusive Systems and Network Management platform from Confiance IP Solutions, Inc.

“We are honored to be MSCP Master certified which puts our Guardian Services in a class of approximately 100 of the best service providers in the US. The Cisco MSCP Master and Cisco Powered designations have truly helped launch the Confiance Guardian Services to the national level,” said Confiance CEO Mike Cotrone.

The “Master MSCP” certification is proof of a solution provider’s sophisticated managed services practices and services, reflecting the best customer experiences.
