

CommScope Joins InService as a new Supplier Member

By Jo Miller

Dated: Apr 08, 2011

InService continues to expand its collaborative community reach with newest member, CommScope

Bellevue, Wash. – April 8, 2011 – InService, the leading network of advanced technology integrators with aggregate sales in excess of \$1.5 billion, is pleased to announce CommScope, Inc., a global leader in infrastructure solutions for communications networks, has joined the InService community as a new Supplier Member.

Jo Miller, Executive Director of Partner Relations stated, “CommScope is a strategic addition to the Supplier Member part of our community. InService will work with CommScope to promote and develop new CommScope Solution BusinessPartners from the Integrators within our community. We are excited to make use of CommScope’s tremendous resources and products to support the physical infrastructure, Data Center and Wireless Mobility needs of our end user clients.”

“CommScope is looking forward to further integrating intelligent solutions into enterprise networks. With InService’s assistance, we will continue to push forward the future of network applications,” added Stephen Kowal, Vice President, Global Channel Sales, CommScope.

About InService

InService is the leading international community of advanced technology integrators that through collaboration and trusted partnership, delivers high-value technology solutions that solve businesses most pressing needs. The InService community’s \$1.5 billion combined global sales, offers great leverage in applying the collective skills of members to deliver any technology, anywhere, anytime. InService members receive tremendous access to new customers, markets, sales opportunities, and collaborate through best practice sharing. The collective strength of InService allows its members to compete against the largest integrators. InService is the community leading the next generation of technology delivery and service through a formal governance model. For more information on how InService
